

Fiberline Quality Policy

At Fiberline, we are committed to:

- Ensure that customers perceive us as a professional business partner within high-quality composite solutions.
- Work closely with our customers to develop products in a systematic and structured manner and thereby ensure that we meet agreed quality commitments.
- Continually develop and streamline our management system and our business processes with the aim of creating value for our customers.

To fulfill our commitments we are :

- Continually monitoring and measuring our performance in the terms of experienced customer satisfaction
- Using customer feedback as a basis on which to constantly improve customer satisfaction with Fiberline products
- Applying the APQP process as a basis for product development.
- At a minimum, complying with the requirements set out in ISO 9001 and in our product certifications, as well as applying quality control tools within the Wind industry (APQP4WIND)
- Ensuring that we have a constant overview of our quality costs in order to continuously reduce these
